

## Procurement & Supply

Lodi has access to an established network of high quality, competitive suppliers and manufacturers of specialist vehicles and equipment.

Working with Lodi to manage your procurement needs will mean significant benefits.....

### Right Specifications

We use our technical skills to assess transport and operational needs and develop vehicle and equipment specifications to meet customer requirements. We will ensure the right products are supplied which will deliver fit-for-purpose, value for money solutions.

### Reliability

Our commitment is to provide a reliable, dependable service. We will work tirelessly to ensure we deliver on time and to specification. We will keep customers informed about quotations, orders and deliveries on a regular basis.

### Support Commitment

Where required, we will provide a suitable support package to help customers get the most from their purchases. We invite customers to consider a range of bolt-on services designed to ensure maximum equipment reliability, maintainability and availability. Services include Fleet Data Management, Contract Maintenance, Fast Moving Parts Packages, Fleet Tracking Systems, Technical Support and Pre-delivery Preparation and Service or Driver Training

### Project Managing Complex orders

Lodi have extensive operational experience of delivering complex vehicle and equipment contracts to government, military and commercial fleet customers on a global scale. Purchase orders that include multiple product types and brands, vehicle modifications and integrated support services require professional Project Management to ensure on-time delivery in accordance with required specifications. Lodi will deliver this.

Lodi's Project Management services are covered in more detail in the PM data-sheet and in the Services page of the website.
